AIRTEK

Construction, Inc.
A Kingdom Company

About AirTek

AirTek is a leading supplier of air pollution control (APC) equipment, providing engineering, construction, and maintenance services. AirTek projects include a variety of APC equipment and we specialize in providing turnkey services. AirTek's corporate office and parts warehouses are located in Troy, AL with a satellite office in Baltimore, MD. Spare parts, construction, and aftermarket engineering are managed from the Troy office. Our Baltimore office is primarily focused on new equipment engineering.

AirTek Parts

AirTek's electrostatic precipitator parts division exists to add value to your company by delivering quality replacement parts, consistently and timely. If you need any precipitator replacement part, we can provide it.

Our extensive precipitator experience, with all OEM's, allows us to provide the parts that will optimize your precipitator's performance year after year.

Doing Everything in our Power
to Ensure the Satisfaction of
Every Customer on Every Project

In-Stock Warehouse

If you need a commonly used precipitator part, chances are we stock it. With two enclosed warehouses, over 200,000 square feet of storage space, and over \$3,000,000 of inventory on hand, we have the parts to service your ESP no matter the original equipment manufacturer (OEM).

Inventory Management

AirTek's integrated approach to parts management not only tracks your annual usage of each precipitator part but also catalogues and tracks your storeroom stock numbers. Our state of the art inventory management solution allows us to anticipate the parts you need, when you most need them.

24-hour Service

In emergencies, response time is critical. Our parts division was designed to respond quickly and efficiently. Whether it's a drag wreck in the middle of the night or a circuit board damaged in a storm, AirTek is available 24 hours a day to support you. We can have the parts you need processed and on their way to you in no time.
